Education

Truman State University

Kirksville, MO

Bachelor of Science in Computer Science, Minor in Data Science

Expected: May 2029

- **Relevant Coursework:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Discrete Mathematics, Computer Systems Architecture, Calculus I & II

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C#, C/C++, SQL, HTML, CSS

Frameworks & Libraries: React.js, React Native, Node.js, FastAPI, LangChain, Express.js, TailwindCSS

Technologies: Git, MongoDB, Firebase, PostgreSQL, Supabase, Selenium, AWS, Docker, GitHub Actions, Unity

Experience

Undergraduate Research Assistant

Oct. 2025 – Present

Truman State University

Kirksville, MO

- Extended an **open-source NL2FOL** pipeline from a Stanford-led research, using Python, pandas, PyTorch, and Hugging Face Transformers to convert natural language into First-Order Logic for robotic planning.
- Developed a **React Native** mobile app for **IOS/Android** with multi-stop planning for robotics navigation.
- Led **HCI** design for accessibility and low-cognitive-load, using clear visuals, minimal steps, and accessible routing, while logging token usage and runtime from the pipeline and app.
- Collaborated in an **Agile** research environment, participating in iterative development and clean code reviews.

Software Engineer Intern

Jun. 2025 – Present

NaNi Kids Futsal - Soccer Academy

Remote

- Migrated legacy codebase to a React / Node / Express / MongoDB website for **1,600+** students, reducing admin workload on attendance, tuition, and student management by **80%**, saving **\$1000+ monthly**.
- Engineered **63+ RESTful** endpoints with JWT role based authentication, rate limiting, paginated queries, and Cloudinary media storage, reducing payload sizes and improving performance by **150 times**.
- Refactored and debugged **3,000+** documents into optimized schemas with aggregation pipelines, automating attendance and tuition workflows, saving **25+ hours/month** while ensuring data integrity.
- Designed a responsive, mobile-first frontend using React, Tailwind CSS, and Framer Motion with multi-language (English/Vietnamese) support for diverse outreach, following Git version control and Agile practices.
- Implemented **CI/CD** pipelines using GitHub Actions and Docker containers, deployed on AWS EC2 server with Nginx reverse proxy, reducing deployment time and ensuring **zero-downtime** in production.

Projects

TruDegree | TypeScript, Python, React.js, LangGraph, FastAPI, Supabase, PostgreSQL, Selenium

[GitHub](#)

- **Won 2nd place** by engineering an **agentic AI academic advisor** using LangGraph's ReAct + GPT-5-mini, enabling dynamic tool use, prerequisite validation, and course sequencing, cutting degree planning time by **98%**.
- Integrated web scraping for **90+** sample plans and **458** course requirements, enabling the agent to analyze and generate personalized plans, while maintaining accuracy with PDF-to-JSON audit parsing.
- Implemented React and FastAPI session management, enabling seamless user interaction with the AI Agent.

WIWI - HackMidwest 2025 | TypeScript, React.js, Python, AWS, Express, MongoDB

[GitHub](#)

- Led a team of 4 to develop an **AI-agentic resale and raffle marketplace** in **24 hours**, combining Node + FastAPI + AWS Bedrock to let users profit from used items while **70%** of overflow revenue goes to charity.
- Created multi-agent AWS Strands for auto verification, pricing, and chatbot (image/EXIF checks, web validation, trust scoring), cutting manual review by **90%+** and delivering an MVP with Stripe, AWS S3, and cron-job.

Leadership

Tech Lead

Aug. 2025 – Present

Google Developer Group

Truman State University

- Directed all major tech initiatives and cross-functional teams, including a **Boeing-partnered** React.js hackathon website deployed on a **Linux** server with Apache, reviewed by IT department for smooth production deployment.
- Facilitated and led technical workshops, guiding **40+** students in learning web technologies (**HTML/CSS**) and enabling them to build real-world projects and strengthen coding skills.
