EDUCATION

Truman State University

Kirksville, MO

Bachelor of Science in Computer Science, Minor in Data Science

Expected: May 2029

- **GPA:** 4.0/4.0 | **SAT:** 1510 | **Relevant Coursework:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Discrete Mathematics, Computer Systems Architecture, Calculus I & II

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Java, Python, C#, SQL, HTML/CSS

Frameworks: React.js, React Native, Node.js, FastAPI, LangChain, Express.js, TailwindCSS, Unity

Technologies: Git/Github, MongoDB, Firebase, Redis, Selenium, AWS

EXPERIENCE

Undergraduate Research Assistant

Oct. 2025 – Present

Truman State University

Kirksville, MO

- Extended an **open-source NL2FOL** pipeline from a Stanford-led research, using Python, pandas, PyTorch, and Hugging Face Transformers to convert natural language into First-Order Logic for robotic planning.
- Building a **React Native** mobile app for **IOS/Android** with multi-stop planning for robotics navigation.
- Collaborated in an Agile research environment, participating in iterative development and clean code reviews.

Software Engineer

July 2025 – Present

NaNi Kids Futsal - Soccer Academy

Remote

- Engineered and **migrated legacy codebase** to a React/Node/Express/MongoDB website for **1200+** students, reducing admin workload on attendance, tuition, and student management by **80%**, saving **\$1000+ monthly**.
- Constructed **45+ RESTful** endpoints and JWT authentication for secure role-based access for 3 roles using Node.js and Express, and integrated **Cloudinary** for secure media storage.
- Migrated and debugged **3,000+** MongoDB documents to various new schemas and optimized aggregation pipelines to automate attendance and tuition workflows, saving **25+ hours/month** while ensuring data integrity.
- Used **Git/GitHub** for version control, and followed Agile SDLC practices to deliver production-ready features.

PROJECTS

TruDegree - ACM Hackathon | TypeScript, Python, React.js, LangGraph, FastAPI, Selenium

GitHub

- **Won 2nd place** by engineering an **agentic AI academic advisor** using LangGraph's ReAct + GPT-5-mini, enabling dynamic tool use, prerequisite validation, and course sequencing, cutting degree planning time by **98%**.
- Integrated web scraping for **90+** sample plans and **458** course requirements, enabling the agent to analyze and generate personalized plans, while maintaining accuracy with PDF-to-JSON parsing.
- Implemented React and FastAPI session management, enabling seamless user interaction with the AI Agent.

WIWI - HackMidwest 2025 | TypeScript, React.js, Python, AWS, Express, MongoDB

GitHub

- Led a team of 4 to develop an **AI-agentic resale and raffle marketplace** in **24 hours**, combining Node + FastAPI + AWS Bedrock to let users profit from used items while **70%** of overflow revenue goes to charity.
- Created multi-agent AWS Strands for auto verification, pricing, and chatbot (image/EXIF checks, web validation, trust scoring), cutting manual review by **90%+** and delivering an MVP with Stripe, AWS S3, and cron-job.

AI Glow | Python, LangChain, FastAPI, React.js, Express.js, Firebase, Redis

GitHub

- Built an **AI-microservices SAT platform** to automate multi-page PDF extraction, and **70+** skill/difficulty tagging while adding caching and batch writes to boost speed, scalability, and cut manual work by 95%.

LEADERSHIP

Tech Lead - Google Student Developer Club | Kirksville, MO

Aug. 2025 – Present

- Directed all major tech initiatives and cross-functional teams, including a **Boeing-partnered** hackathon website deployed on **Linux/Apache**, reviewed by IT department for smooth production deployment.
- Facilitated and led technical workshops, guiding **40+** students in learning web technologies (**HTML/CSS**) and enabling them to build real-world projects and strengthen coding skills.
